

SERVICELINE[®]

MOTOR SHIELD

SERVICELINE[®] MOTOR SHIELD — Cleaner Motors, Lower Maintenance, Easy Installation

Just cut and snap in place! Serviceline Motor Shield's patented cut-and-snap design gives you the convenience of easy installation and ready availability so you can get the job done without the cost or hassle of custom fabricated motor covers.

SERVICELINE[®]

U.S. Patent Protected

What makes Serviceline Motor Shield simple?

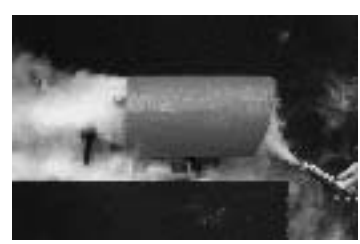

- Immediate shipment available on all standard NEMA frames.
- No complicated measurements
- Installs in minutes. Cut a slot for the conduit box and snap over the motor.
- Complete motor accessibility. Removing the cover takes one individual less than 5-seconds, even on a 200 hp motor.

Serviceline Motor Shield benefits

- Serviceline Motor Shield covers shield the cooling fins and typically reduce internal temperatures on TEFC electric motors.
- Debris lands on the cover not in the cooling fins.
- The patented form-fitting design creates a wind tunnel effect through the fins to push heat off the motor.
- Form fitting covers also prevent air from deflecting away from the motor
- Motor Shield covers help reduce motor noise.

Stock Sizes for the Following NEMA Frames	
	56
	143, 145
	182, 184
	213, 215
	254, 256
	284, 286
	324, 326
	364, 365
	404, 405
	444, 445
	447, 449
	5000 Series
Custom sizes available on request	

- ✓ Aggregate/Cement
- ✓ Food
- ✓ Mining
- ✓ Forest/Paper
- ✓ Petro/Chem
- ✓ Unit/Baggage Handling
- ✓ HVAC/Industrial Air Handling
- ✓ Environmental/Fluid Power
- ✓ Automotive
- ✓ Metals

Motor Shield covers create higher airflow to force heat off the motor.

SERVICELINE MOTOR COVERS

1. Clean & Dry Motors

Let the debris fall. Serviceline motor covers protect from falling, splashing, and flying debris. Motors stay clean and dry under the Motor Cover.

2. Simplicity

Standard sizes for all NEMA Frames. No need to measure or custom fit. All standard NEMA Frames in stock for immediate delivery.

3. Easy Installation

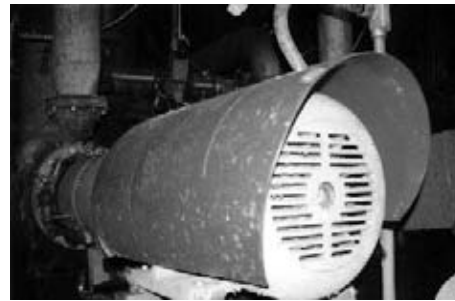

Serviceline covers snap over your motor and stay in place without requiring bolts or straps. And they won't vibrate off.

4. Noise Reduction

Natural dampening properties will help lower motor noise.

5. Proven

Thousands of covers installed in major paper mills, coal mines, and aggregate plants worldwide.
